PROFILE

Enthusiastic and dedicated full-stack developer with a solid foundation in front-end technologies and a keen eye for design. Captivated by the power of visualizing code and its impact on user experiences. Passionate about front-end development, further enhanced by exposure to back-end concepts.

PROJECTS

Sterling Refinishing - React Website June 2023 - Current

In Progress

- Contributed to the development of a company website in a startup environment, showcasing the company's offerings and demonstrating the transformative effects of refinishing
- Collaborated closely with the company owner to optimize and customize various components of the website to align with their preferences and vision

Rooted Faith - React Website April 2023 - Current

<https://rootedfaith.netlify.app/>

- Engineered component for rooting beliefs in scripture
- Calibrated back-end infrastructure to load dynamically

Custom Frontend - React Project April 2023

<https://github.com/CalebHouse99/hogwarts-black-market>

- Collaborated in a partnership to achieve project goals, given a Harry Potter theme
- Executed full project lifecycle, from ideation to deployment
- Developed a responsive web application using React.js and React Router to create a multi-page user interface

EdgeLedger - HTML & CSS Project February 2021

<https://github.com/CalebHouse99/edgeledger>

- Integrated CSS classes to recreate basic components for a fictional business website
- Configured a multi-page interface
